# Triton Features

## Eliminate The Emergency

### LeakSense™

Intelligent leak detection system catches leaks as small as a grain of sand and provides real-time alerts that help prevent catastrophic failure.

### EcoNet® Smart Monitoring Technology with Integrated Wi-Fi

Exclusive technology provides performance updates and alerts via mobile device and full-color LCD display.

### Systematic Health Checks

Ongoing self-monitoring of Triton's most vital components detects and alerts of potential issues.

### Preventive Maintenance Alerts

Preventive maintenance reminders to extend the life of the tank.

## Easy Retrofit

### Universal Retrofit Across Brands

Replace any brand in the market with multiple water connection points and flexible venting options.

### Multiple Connection Points

Multiple water connections at the top, side and bottom of the unit simplify installation.

### Variety of Flexible Venting Options, Including InnoFlue® Flex Venting

Ideal for replacements and new installs with a selection of the most flexible PVC venting choices, including polypropylene, PVC, CPVC, InnoFlue® Flex Venting and ABS materials; installed in power direct and power vent configurations; can vent 2-, 3-, 4- and 6-inch diameters.

### Patented Built-In Condensate Neutralizer

Reduces water acidity for safe drainage at no additional cost.

## Built To Last

### Triple Pass Heat Exchanger

Constructed with premium ASME-grade steel to minimize rust and corrosion for extended tank life and maximum thermal efficiency.

### Advanced Power Anodes

Self-adjusting, non-sacrificial power anodes provide systematic monitoring of anode health and remaining life on full-color LCD unit display.

### Longer Useful Life

Triton was designed to last up to 5 years longer than the average commercial water heater.

# TRITON COMMERCIAL GAS WATER HEATERS

TRITON®

## TRITON HIGH-EFFICIENCY COMMERCIAL GAS WATER HEATER

- The most accurate, all-inclusive leak detection and prevention system in the market • LeakSense™ – intelligent leak detection system detects leaks as small as a grain of sand and provides real-time notifications that warn you before catastrophic failure occurs • Systematic Health Checks with Maintenance Alerts – ongoing self-monitoring of Triton's most vital components and alerts of potential issues • Standard built-in Condensate Neutralizer reduces installation time as plumbers no longer need to install this component • Multiple Connection Points – multiple water connections at the top, front and back of the unit simplify installation for replacement of any model • Variety of flexible venting options, including InnoFlue® Flex Venting – polypropylene, PVC, CPVC, InnoFlue® flex vent and ABS materials; venting 2-, 3-, 4- and 6-inch diameters • Triple Pass Heat Exchanger – constructed with premium ASME-grade steel to minimize rust and corrosion for extended tank life and maximum thermal efficiency • Advanced Power Anodes – self-adjusting, non-sacrificial power anodes provide systematic monitoring of anode health and remaining life • Meets 14ng/J requirement for Ultra-Low NOx • Thermal efficiency 95% to 98% • Additional sizes and configurations available via Special Order with 3- to 5-day delivery

**3-YEAR WARRANTY ON TANKS AND 1-YEAR WARRANTY ON PARTS**

# COMMERCIAL ELECTRIC WATER HEATERS

## COMMERCIAL ELECTRIC WATER HEATER

• 98% thermal efficiency • Delivers water greater than 170°F • Terminal blocks allow conversion from single-phase to three-phase • Terminal blocks allow simultaneous or non-simultaneous wiring (light-duty only) • Automatic temperature control • 30- to 119.9- gallon capacities • 208V, 250V, 277V and 480V • 4.5-36KW | Low-lead compliant • Easily convert standard models from simultaneous to non-simultaneous, single-phase to three-phase • Porcelain enamel lined tank • Automatic temperature control • 30 to 119.9-gallon capacities • 208, 240, 277 and 480 voltages • 4.5-36KW

**3-YEAR WARRANTY ON TANKS AND 1-YEAR WARRANTY ON PARTS**
