

Our tile kits are an innovative product that is a single, integrated system providing the classic look and feel of traditional ceramic tile without the need for costly specialized skills or tools.

Ideal for bathroom tub surrounds, showers, kitchen backsplashes and walls, these lightweight, flexible yet durable large format sheets install with a speed that is unmatched, resulting in a cost-efficient, professional look in about an hour.

EASY INSTALLATION

1 MEASURE AND CUT SHEETS

You can use a standard utility knife, rotary cutter, oscillating saw or circular saw to cut the tile. Access holes for pipes, light switches and outlets can be cut with a hole saw or oscillating saw. No special tile skills or tools required.

2 ATTACH TO SURFACE

No special surface prep is necessary. This product can be installed over drywall, cement backer boards or even existing tile. Attach tile sheet to the surface using construction adhesive or type-1 mastic. Our tile sheets are flexible for easy installation around obstacles or uneven surfaces. For backsplashes, use spacers on joints to maintain consistent grout lines. Tub surrounds incorporate a water-tight seal that also creates proper grout lines.

3 GROUT, FINISH AND ENJOY!

Edging can be used on exposed ends. Grouting can begin immediately. Use unsanded or nonsanded grout only. What would normally take days with traditional ceramic tile, takes only about an hour!
